

An educational tour was organized by the Dean of Research and Academics at IIT Roorkee for the Pre-Ph.D. students of Batch 2023 on September 22, 2023. All the research scholars went on an educational tour with their respective faculties. A total of 26 students left for the tour at 9:30 a.m. with the two faculty members. An educational tour is very important for students in any field, as it helps explain things to them practically and interestingly. The primary objectives of the visit were as follows:

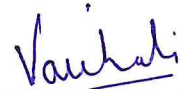

- To explore the facilities and resources available at IIT Roorkee's library.
- To interact with faculty and researchers to gain insights into their ongoing research projects.
- To understand the academic and research environment at the institution.
- To gain insight from advanced research conducted by the department of psychology.

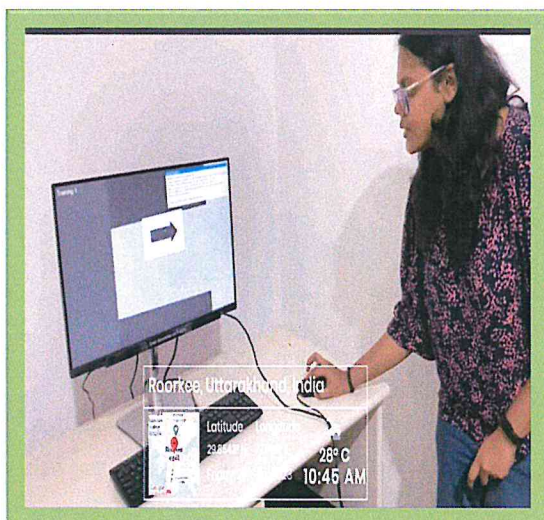

As soon as the students reached their destination, they were taken to the psychology laboratory to witness various bio-physiological analyses and the central library as well. Students learned about new research in their field and were extremely pleased with the educational tour. Things perceived by one's own eyes help remember things for a very long time as compared to reading.

Overall, our visit to IIT Roorkee was a valuable experience that enriched our understanding of the institution and its resources. We would like to express our gratitude to the Dean for arranging this visit, and I believe that the insights gained will contribute to my academic and research pursuits.

We extend our thanks to Prof. Manish Asthanaji, Associate Professor, Department of Psychology, Librarian Dr. C. Jai Kumar, Assistant Librarian Dr. Rimai Atonring, and Ph.D. Scholar Ms. Sharmili for their warm welcome and assistance during the visit.

Photographs of the tour have also been attached to this report.
